-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors, e.g., typographical, grammar, idiomatic, syntax and etc. Applicants' cooperations are requested in correcting any errors of which applicants may become aware in the specification.

The disclosure is objected to because the following is missing from the specification: This application is a 371 of PCT/EP03114187 filed 12/13/2003.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 and 7-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). Claim 7 reciting “ further comprising a device” provides for ambiguity as it does not add any further additional step(s) to the process of claim 1. See also claims 13-14.

b). The subject matter of claim 21 is already in claim 8, the claim from which it depends, claimed twice?

c). The inconsistent used of terminology in the claims is improper such as "at least one one ...solvent" in claim 1, line 3, as opposed to "the solvent" in claim 1, line 4.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 7-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koster et al (4,195,032).

Koster discloses substantially the process as claimed. See col. 1, lines 8-9 and cols. 6 to 13. While not positively recited, the flow (202) from A overhead to bottom of A', shown in Fig. 2 of Koster, would at least be suggestive of the claimed "wherein the heat of condensation of the solvent vapor from the first apparatus being used is utilized for partial or complete vaporization of solvent in the second apparatus".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a). Arribas et al discloses a process for the production of pure distilled isocyanates.
- b). Adica et al discloses the purification of an organic diisocyanate by fractional distillation in the presence of an organic solvent.
- c). Bloom et al discloses the recovery of organic isocyanates.
